C/C++, SQL, C#/.NET, Typescript, Angular
Git/Github, Agile, Legacy Migration

Professional Experience

Software Engineer

Google - Youtube BrandConnect   October 2025 - Present

  Worked in a small zero to one team to develop an app to connect advertisers to partnered YouTube creators.

  Designed and created new end-to-end methods of promoting sponsorships for creators.

  Helped onboard and mentor new Googlers and was a part of the interviewing team.

Software Engineer

Kion Group AG   May 2023 – September 2025

  Migrated legacy codebases in C and C++ to custom-stack web-based solutions with retrofitted API's.

  Developed new automation system to increase throughput of Procter & Gamble factory-to-location deliveries.

  Responsible for onsite integration testing and production deployment across three customer locations in two countries.

Contract Software Engineer

American Federation of Government Employees   March 2025

  Engineered a data processing pipeline to extract, clean, and analyze contract savings data, identifying inconsistencies and missing information from DOGE website.

  Developed structured datasets and reports that enabled legal teams to challenge Department of Government Efficiency (DOGE) claims, strengthening litigation e orts in fighting against the targeted attacks on unioned departments and their real-estate holdings.

  Built interactive data visualizations to highlight discrepancies and trends, improving legal discovery and case preparation.

Software Engineer Intern

Eagleview Technologies   Jan 2022 – Aug 2022

  Automated data storage and management for government contract compliance.

  Designed cloud-based solutions to automate populattion of key data, reducing pilot hando delays.

  Developed new front-end tools for GIS systems and first-responder mapping solutions.

Education

Rochester Institute of Technology

B.S. Computer Science   Aug 2019 - Dec 2023
